GAME FEATURES

Roaming Wild

In the vast expanse of Cyberslot's outer space, the majestic Golden Roaming Wild is a constant presence amidst the cosmic chaos. Each Roaming Wild Multiplier begins its journey at x1, steadily increasing by x1 whenever it substitutes in a win during the first reaction and every second reaction thereafter. These celestial wanderers shift to 1 of the 9 onscreen positions after each win in the base game and 1 of the 81 onscreen positions during Free Spins. When Roaming Wilds move to a new position, they are replaced by 9 new symbols in the base game and 4 new symbols in Free Spins.

Megaclusters™

Megaclusters™ is a revolutionary symbol matching mechanic where winning symbols split and react. Each base game spin begins with a 3x3 grid, while Free Spins is a 9x9 grid. Every spin in the base game, 1 position is chosen at random to display 9 smaller symbols. Wins consist of 5 or more matching symbols of any size, horizontally or vertically adjacent, creating a cosmic chain reaction as they split, replaced by 9 smaller in the base game or 4 smaller in Free Spins. When wins occur with these smaller symbols, symbols of the same size above them collapse downwards and new symbols drop in from the top of the screen to fill available positions on the board.

Free Spins

Unlock the secrets of the cosmos when 12 or more reactions occur in the base game, warping time and space to grant you 6 free spins. The Roaming Wild Multiplier carries over from the triggering spin into Free Spins. Every time the Golden Roaming Wild Multiplier reaches a multiple of 10, enjoy an extra 2 free spins to amplify your journey through the cosmos. The first retrigger unleashes the Rainbow Roaming Wild, a companion to the Golden Roaming Wild throughout the remaining free spins, intensifying the possibilities for astronomical victories!
