HOW TO PLAY

The objective of EZ Dealer Roulette is to predict the number on which the ball will land by placing one or more bets that cover that particular number. We use a European Roulette that includes the numbers 1-36 plus a single 0 (zero) system, which randomly chooses the winning numbers based on a mathematical algorithm.

After betting time has expired, the ball is spun by the beautifully pre-recorded Roulette dealer. The ball will eventually come to rest in one of the numbered pockets, and the winning number is displayed on the screen.

You win if you have placed a bet that covers the winning number.
