AMERICAN (DOUBLE ZERO) ROULETTE (NEW JERSEY ONLY)

The classic American double-zero format meets the needs of the US market. The American-style wheel features one extra pocket (00) compared with European and 00 on the table layout. The number order is also different around the wheel, which is significant for players placing a neighbour bet.

- Low betting limits to attract more players
- Additional 'Five Bet', in which one chip/bet covers five numbers: 0, 00, 1, 2 and 3
- Increased house edge of 5.3% overall.

EZ DEALER ROULETTE

EZ Dealer Roulette uses a pre-recorded video in conjunction with a Random Number Generator (RNG) system, which randomly chooses the winning numbers based on a mathematical algorithm. Players will get to experience a stunningly created environment as well as a thought-out, modern and simple-to-use user interface, with full gameplay live statistics.

- Authentic Roulette experience
- Perfect for markets where live dealers are not permitted
- Available in English, Thai, Japanese, Chinese-Mandarin and Brazilian Portuguese.

ULTIMATE ROULETTE

Ultimate Roulette is a unique multiplier Roulette. One to five Lucky numbers are picked every round to receive random multipliers, which may reach up to 1,000x. Players can buy up to three extra multipliers per game. What is more, the multipliers can expand and spread to up to three neighbours on the betting grid. The new numbers will receive the same multiplier as the original number.

For lucky players, the value of their bought numbers' multiplier can double, making it possible to win up to 2,000 times their bet—what an exciting show!

HOW TO PLAY

The objective of Roulette is to predict the number on which the ball will land by placing one or more bets that cover that particular number. The wheel in European Roulette includes the numbers 1-16 plus a single 0 (zero).

You can place many different kinds of bets on the Roulette table. Bets can cover a single number or a certain range of numbers - each type of bet has its own payout rate.

Bets made on the numbered spaces on the betting area, or on the lines between them, are called inside bets, while bets made on the special boxes below and to the side of the main grid of numbers are called outside bets. A Straight Up bet or a Split bet are examples of inside bets, bets on Red/Black or Even/Odd are examples of outside bets.

After the betting time has expired, the ball is spun within the Roulette wheel. The ball will eventually come to rest in one of the numbered pockets. You win if you have placed a bet that covers that particular number.

Neighbour bets are placed on a special oval or racetrack-shaped betting area that allows you to more easily place neighbour bets and other special bets. Each bet covers a different set of numbers and offers different payout odds. Bet spots will be highlighted on the betting grid when placing neighbour bets.
