HOW TO PLAY

The objective of Claw Roulette is to predict the number that the claw will pick up by placing one or more bets that cover that particular number.

BETTING PHASE

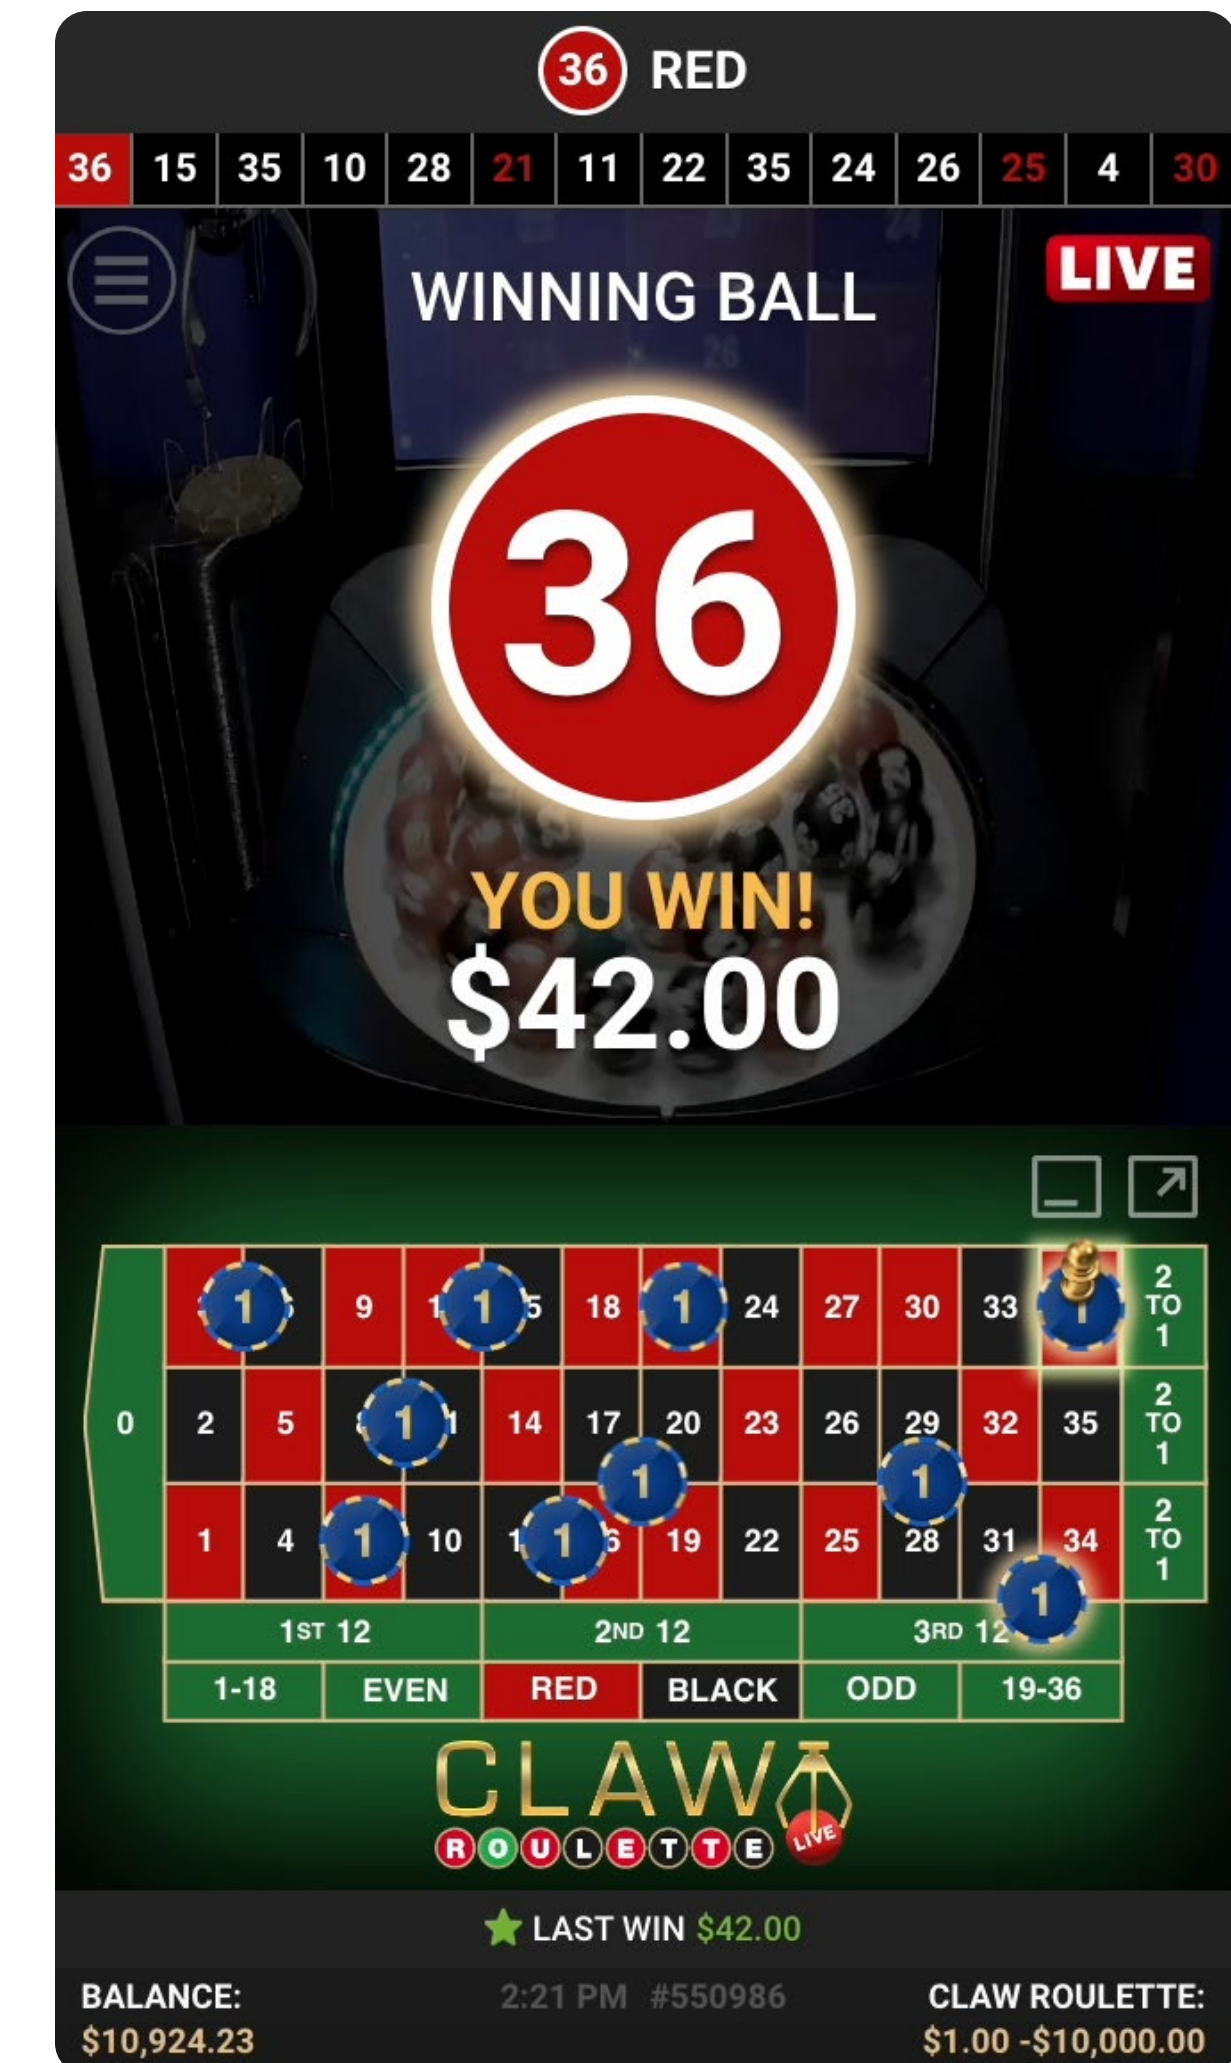

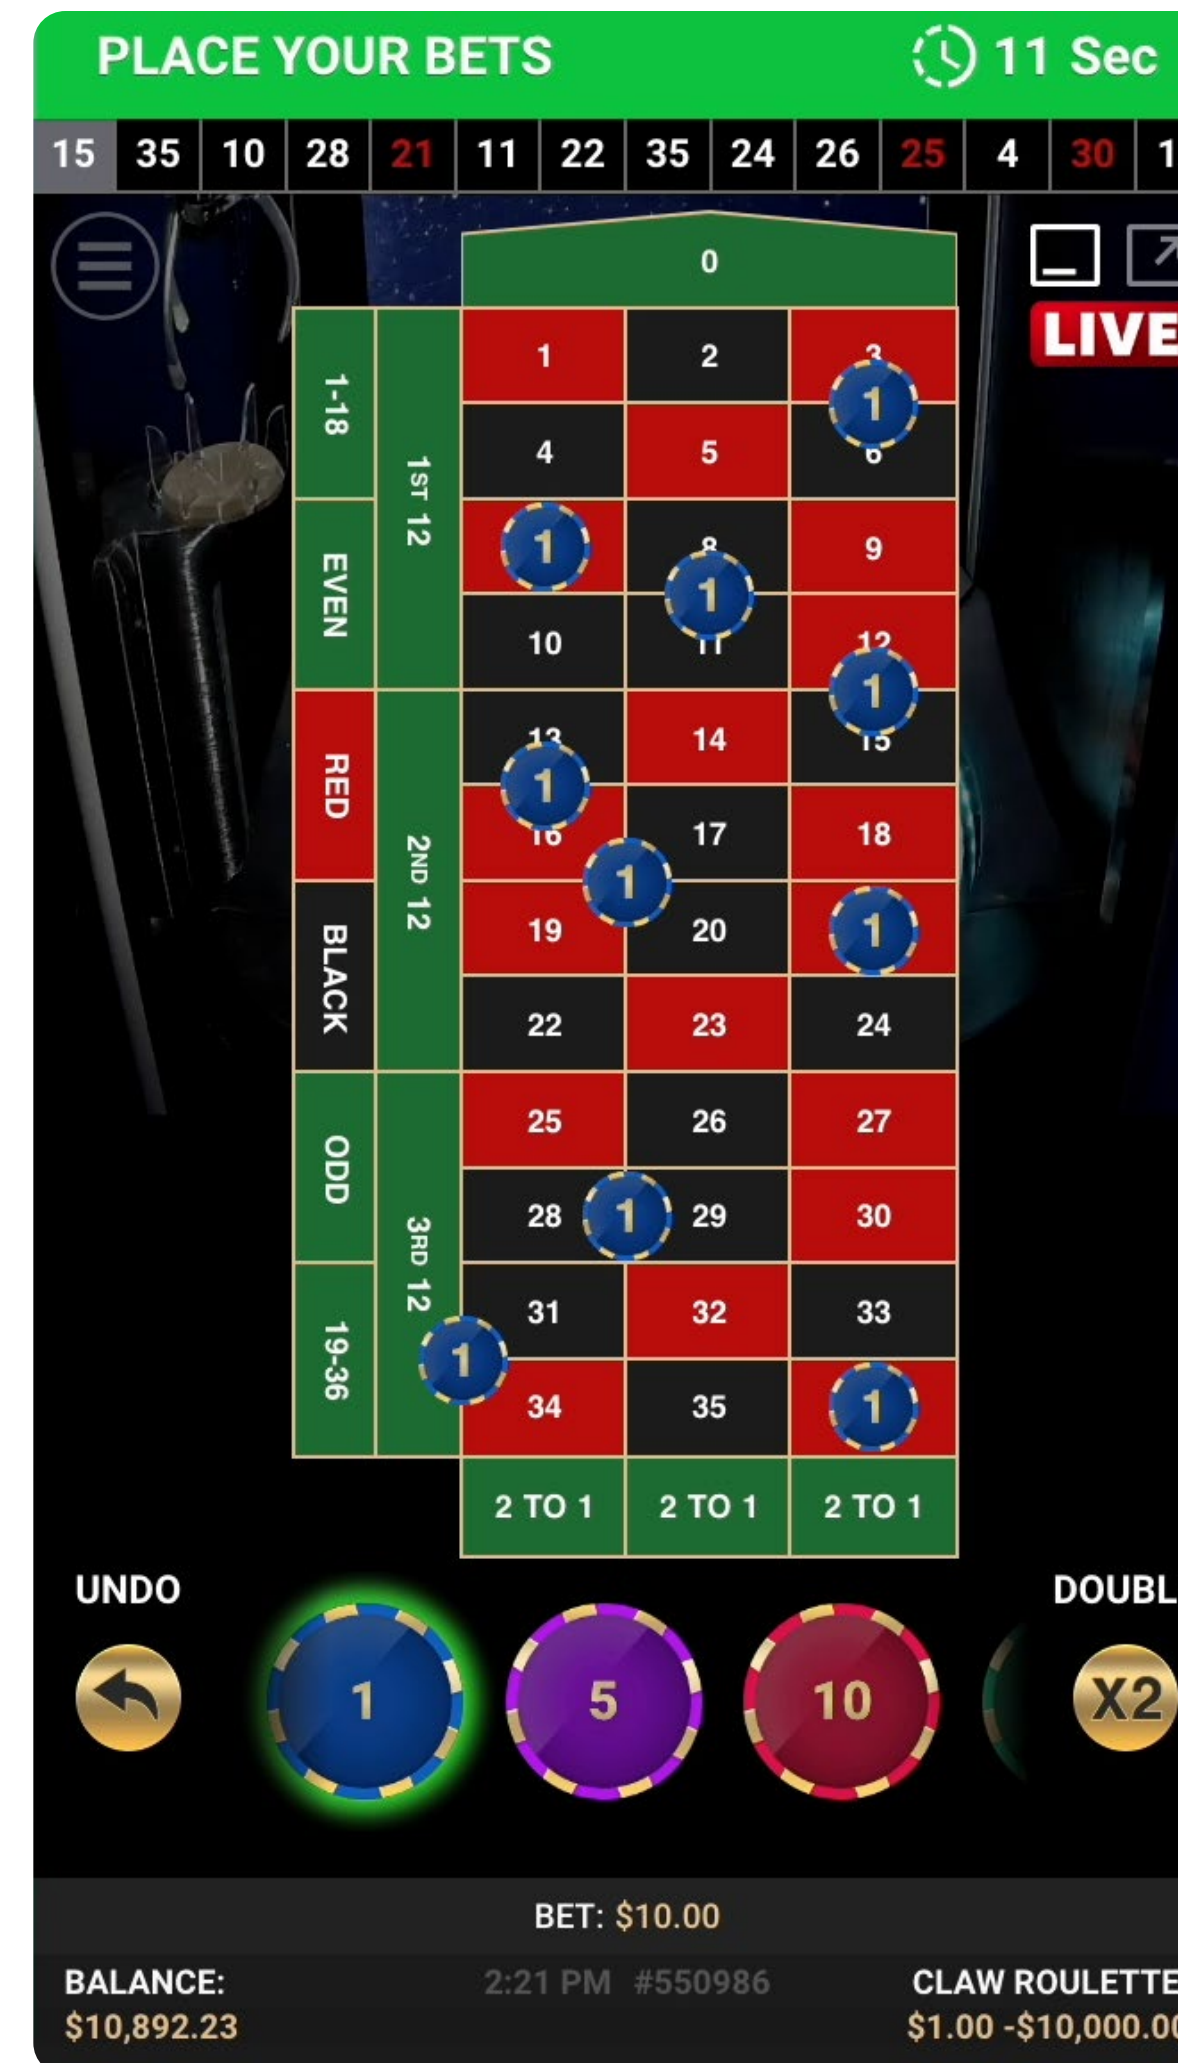

Place one or more chips on the betting grid to participate in the game.

You can place many different kinds of bets on the betting grid. Bets can cover a single number or a specific range of numbers; each type of bet has its own payout odds.

THE RESULT

After betting time has expired, the autonomous claw will navigate and pick up a random number ball from the plate.

You win if you have placed a chip on that particular winning number.
