## A BLEND OF CLASSIC COIN PUSHER AND LIVE CASINO EXCITEMENT

Introducing Fortune Pusher, a captivating addition to the EZ Arcade portfolio! Revolutionising the live casino experience worldwide, Fortune Pusher brings the nostalgic charm of arcade games straight to players at home or on the move.

Fortune Pusher adapts the familiar and much-loved Coin Pusher arcade game, blending its classic elements with live casino features for an engaging and interactive experience, offering multipliers up to 500x.

In this single-player game, you take control of a coin cannon, launching coins onto the playfield. As the game progresses, coloured payout chips are

randomly pushed onto the tray, adding an element of chance to the gameplay. With each coin launch, newly deposited coins push the accumulated coloured payout chips forward.

You eagerly wait in suspense as payout chips teeter over the coin ledge, rewarding you with enticing cash prizes upon their descent. Additionally, the excitement peaks with the appearance of special Bonus chips, which trigger a Bonus wheel. This wheel allows you to win either cash prizes or free game rounds, further enhancing the thrill of the game.

### KEY BENEFITS

- A revolutionary blend of Coin Pusher and live casino gaming
- Multipliers up to 500x
- Bonus chips unlock cash prizes or free game rounds
- Player-controlled coin cannon for thrilling gameplay.

## HOW TO PLAY

The objective of Fortune Pusher is to strategically launch coins onto the playfield, aiming to push and cascade them in a way that triggers the release of valuable coloured payout chips and special Bonus rewards.

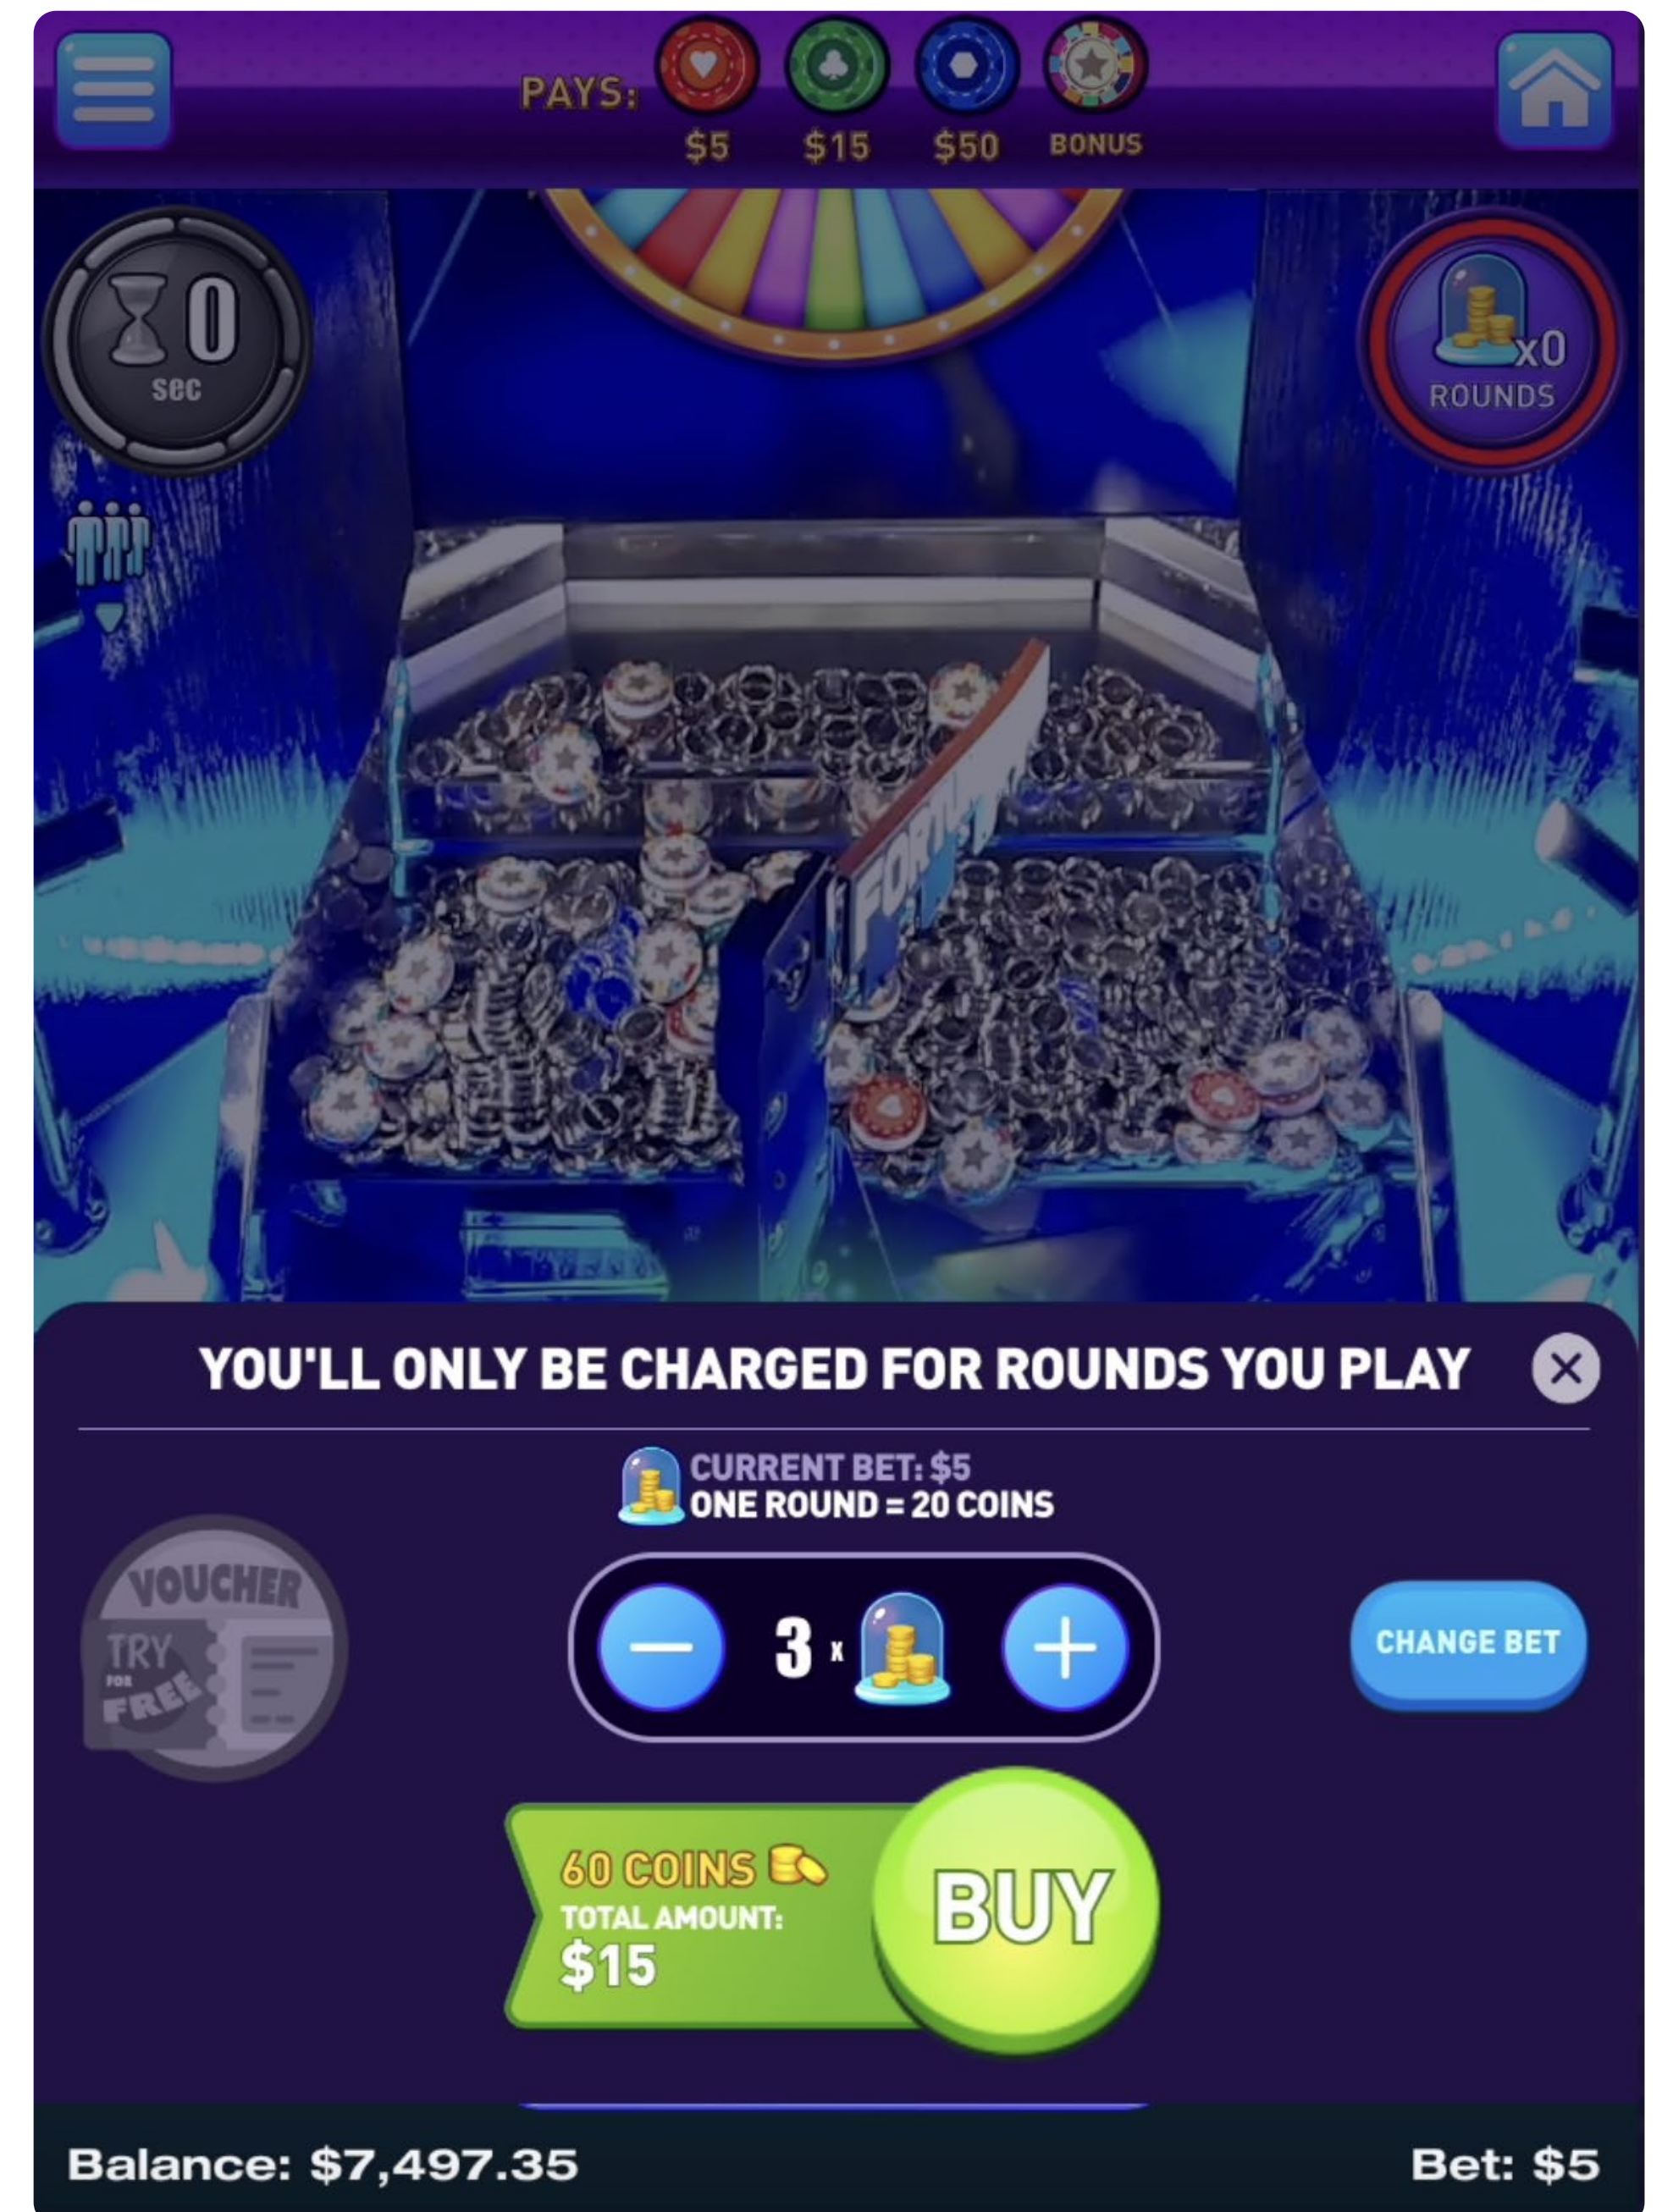

### BETTING PHASE

Choose the bet value you wish to play with to join the game.

Once selected, you will be able to observe the game and check the queue status of that particular live machine.

To start the game, purchase stacks of coins. Each stack consists of 20 coins, allowing you to play one game round.

Each stack costs the same as your initial bet value. You'll only be charged for the game round that you play.

## MAIN GAME

Adjust the coin cannon's aim using the slider and click the 'Fire' button to shoot coins. If you haven't launched your coins by the time the timer expires, they will be released automatically.

## GAME OUTCOME

Winning and getting a payout involves pushing coins and coloured chips off the ledge. Each coloured chip has a monetary value defined in the payable. The more valuable the chip, the higher the payout.

The Bonus chip offers additional winning opportunities. It allows you to increase your winnings or triggers scatter prizes, such as receiving another stack of 20 coins.

## AUTOPLAY

'Autoplay' enables continuous play until specific conditions are met. This feature keeps the game going without interruption, automatically firing coins onto the platform to push chips off the ledge and accumulate winnings effortlessly. It remains active until certain criteria are reached, such as a set number of coins or triggering special events like the phantom chip.

Opt for 'Autoplay' to keep playing until any of the following conditions are met:

- Stop after a set number of rounds
- Stop if a single win surpasses a designated value.

Furthermore, you can toggle 'Auto swing' on or off. When enabled, the aim direction of the coin cannon will continuously shift, while disabling 'Auto swing' will maintain a constant aim direction.

## BONUS GAME

A Bonus chip, a special coloured token, when pushed off the ledge, triggers the Bonus wheel to spin, initiating the Bonus round.

The prize you win is determined by the segment where the wheel comes to a stop.

This prize could be either a monetary award or a scatter prize, adding an extra stack of coins to your current balance or providing free game rounds.
