HOW TO PLAY

The objective of the game is to match the numbers on your bingo card with those drawn by a Random Number Generator. To win, you must be the first player to complete one, two, or all three lines on your card. Each bingo card has 15 numbers from 1 to 90, randomly placed on a grid of three rows and nine columns. As numbers are called out, they are automatically marked off on your card. The objective is to complete the specific winning patterns before anyone else.

BETTING PHASE

To participate, purchase at least five bingo tickets. Each ticket gives you a randomly selected grid of numbers for the game, allowing you to try and match the winning patterns. You can buy up to 50 tickets per game round.

Once the betting time is over, the RNG will select random numbers, which will be displayed in the user interface. If the drawn number matches the number on any of your cards, the number will be marked orange. The game continues until all numbers on one or more of your tickets are marked.

THE RESULT

The winnings are determined by matching the numbers on your bingo ticket with those drawn. Your ticket is checked for winning patterns, such as one line, two lines, or a full house (all three lines), to see if you've completed any of them.
