HOW TO PLAY

The objective of Ultimate Roulette is to predict the number on which the ball will come to rest in the wheel by placing one or more bets that cover that particular number. The wheel includes the numbers 1–36 plus a single zero.

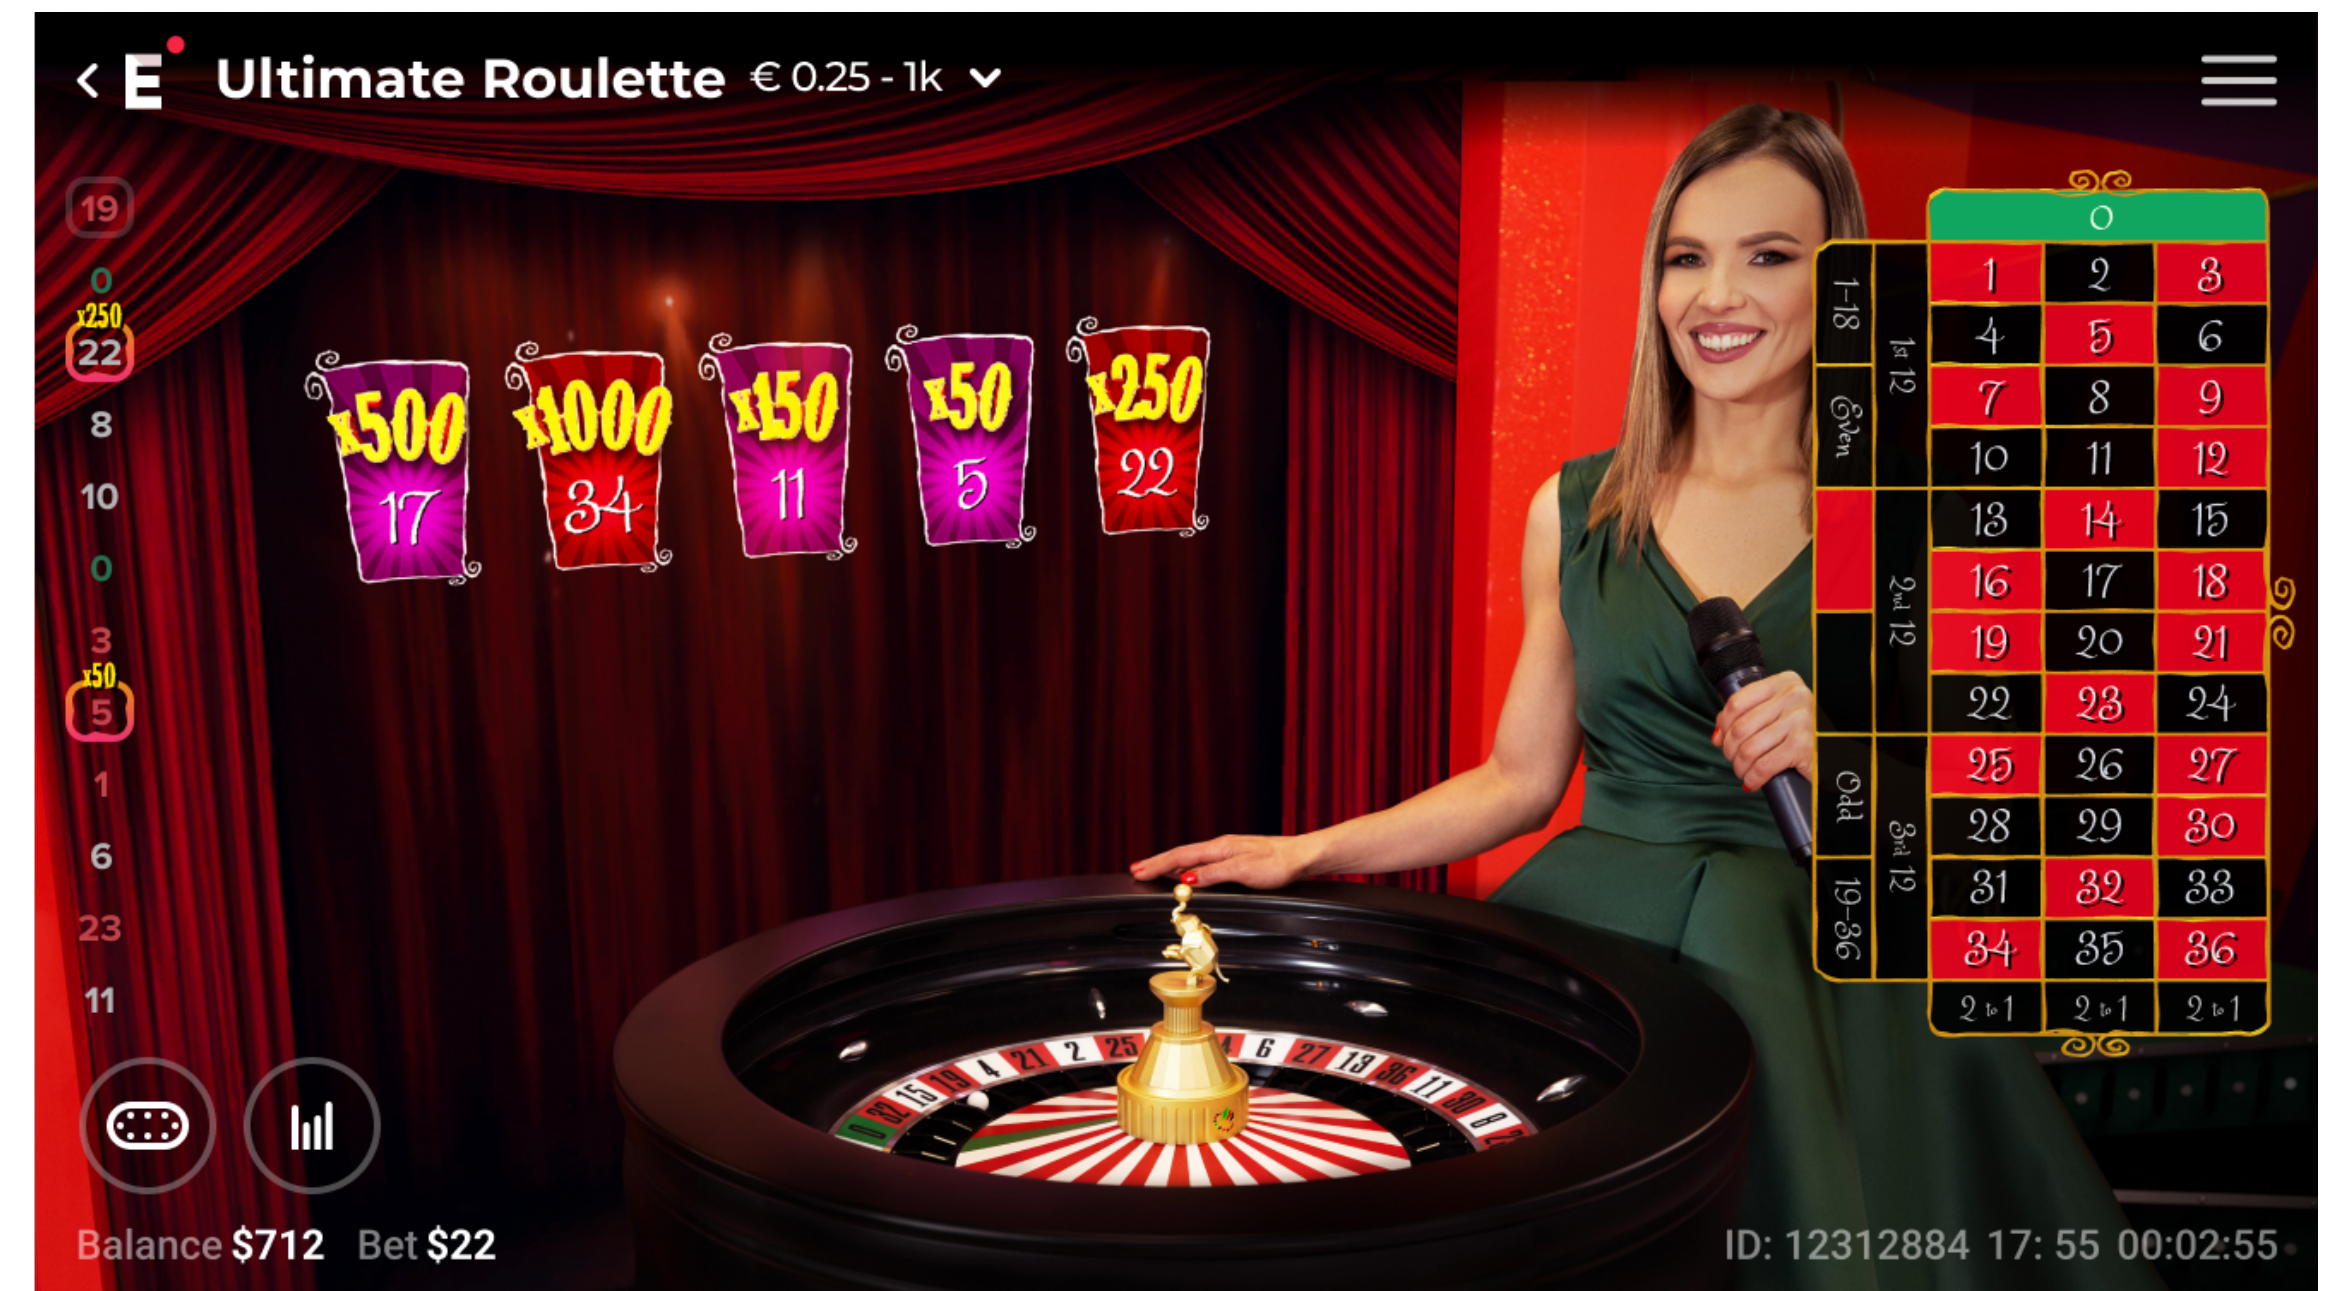

The basic bet on a single number is called a Straight Up bet. You can also place many different kinds of bets on the Roulette table. Bets can cover a single number or a certain range of numbers. Each type of bet has its own payout rate.

The ball is spun automatically by an Auto Roulette wheel. After betting time has expired, one to five randomly selected multipliers will appear on the betting grid and will be announced by the game presenter. Once the Extra Multiplier pop-up window appears players may choose to buy up to three multipliers, with each extra multiplier costing 10% of the player's bet.

What's more, in each round there is a chance for the multipliers to expand and spread to up to three neighbours on the betting grid. Each new number receives the same multiplier as the original number.

The ball will eventually come to rest in one of the numbered pockets on the wheel.

The player wins if they placed a bet that covers that particular winning number. If the winning number is among the randomly selected numbers and/or purchased extra multipliers, then the bet is multiplied by the random or extra multiplier.
