

A man with a beard and short dark hair is sitting at a green poker table. He is wearing a light-colored shirt and has his hands clasped on the table. In the center of the image, there is a large, stylized logo for "Russian POKER". The logo features a fan of five spade cards: 10, J, Q, K, and A. Below the cards, the word "Russian" is written in a large, gold, cursive font with a black outline. Below "Russian", the word "POKER" is written in a bold, red, sans-serif font with a black outline. The background is a dark, wood-paneled wall.

UNIQUE POKER VARIANT

Russian Poker is an exciting Poker game which is played against the dealer using standard Poker rules for ranking and comparing hands. The game is hugely popular in Eastern and Central European markets, offering multiple opportunities during the game to boost excitement while making decisions. The aim of the game is to beat the dealer's five-card Poker hand by creating a stronger Poker combination. To add to the excitement of the game, players can also exchange cards for a stronger hand, buy an additional 6th card or buy insurance for a strong hand.

The dealer needs a hand that contains at least an Ace+King combination to qualify. If you've got a strong hand, you can even buy a card to help the dealer qualify.

You can make a double Poker combination if the second combination contains at least one card that is not part of the first combination.

Russian Poker is streaming live from our state-of-the-art studio with highly trained and engaged dealers.

KEY BENEFITS

- Win on two unique Poker combinations
- Swap cards for a stronger hand
- Buy a card to help the dealer qualify
- Insurance for valuable combinations.

HOW TO PLAY

START OF THE GAME

When the game round starts, the player places an initial bet on the Ante spot. The dealer will deal five cards face up to the player and five cards to the dealer with one card open. The dealer re-arranges the player's cards to show the strongest Poker combination of this hand. The player must decide whether to Bet, Fold, Swap or Buy one extra card.

BET

If the player has a strong hand they can choose to bet to continue the round without any additional decisions.

FOLD

Players can fold and not continue the round.

BUY

Players can buy an additional one card at the cost of one Ante to receive an extra card.

SWAP

Players can choose to swap cards with community cards at the cost of one Ante. You can swap between two to five cards.

GAME FLOW

After all players have made their decisions, the dealer will burn a card and deal five community cards. The community cards replace the cards that the player decided to swap in the order they are dealt.

If the player decided to buy an extra card, the first community card will be dealt to the player. If the player decided to swap or buy an extra card, you make the final decision to BET or FOLD after the community cards are dealt. After the decisions have been made, the dealer will reveal their four remaining face-down cards. If the dealer has qualified, the winner will be decided and the game round will conclude.

If the dealer did not qualify because they do not have at least an Ace King combination, you can help the dealer to qualify by exchanging their highest card with a new card.

If the player decided to buy a new card for the dealer, the dealer will burn a card and then draw a new card to replace the previous high card. After this, the winners will be decided and the game round will conclude.

INSURANCE

If you have at least a Poker combination of Three of a Kind plus Ace King, you can insure your hand against the dealer not qualifying after the community cards are dealt.

DOUBLE POKER COMBINATIONS

You can win on a double Poker combination in Russian Poker. The second combination has to include at least one card that is not part of the first combination.

GAME OUTCOME

OUTCOME	ANTE	BET	INSURANCE
Dealer has qualified and you win	Push	Win	N/A
Dealer has qualified and you tie	Push	Push	N/A
Dealer has qualified and you lose	Lose	Lose	N/A
