REEL BOMBS

WIN UP TO 10000X!

Four bomb colours, four blast patterns. Explosions blast identical symbols into each adjacent cell in the pattern.

REEL BOMBS

Bombs lock onto the reels and count down with every spin to an explosion. Different colour bombs leave different blast patterns. Every cell in the blast pattern is replaced with an identical mystery symbol. Unexploded bombs caught in the blast will be detonated too!

WIN LINES

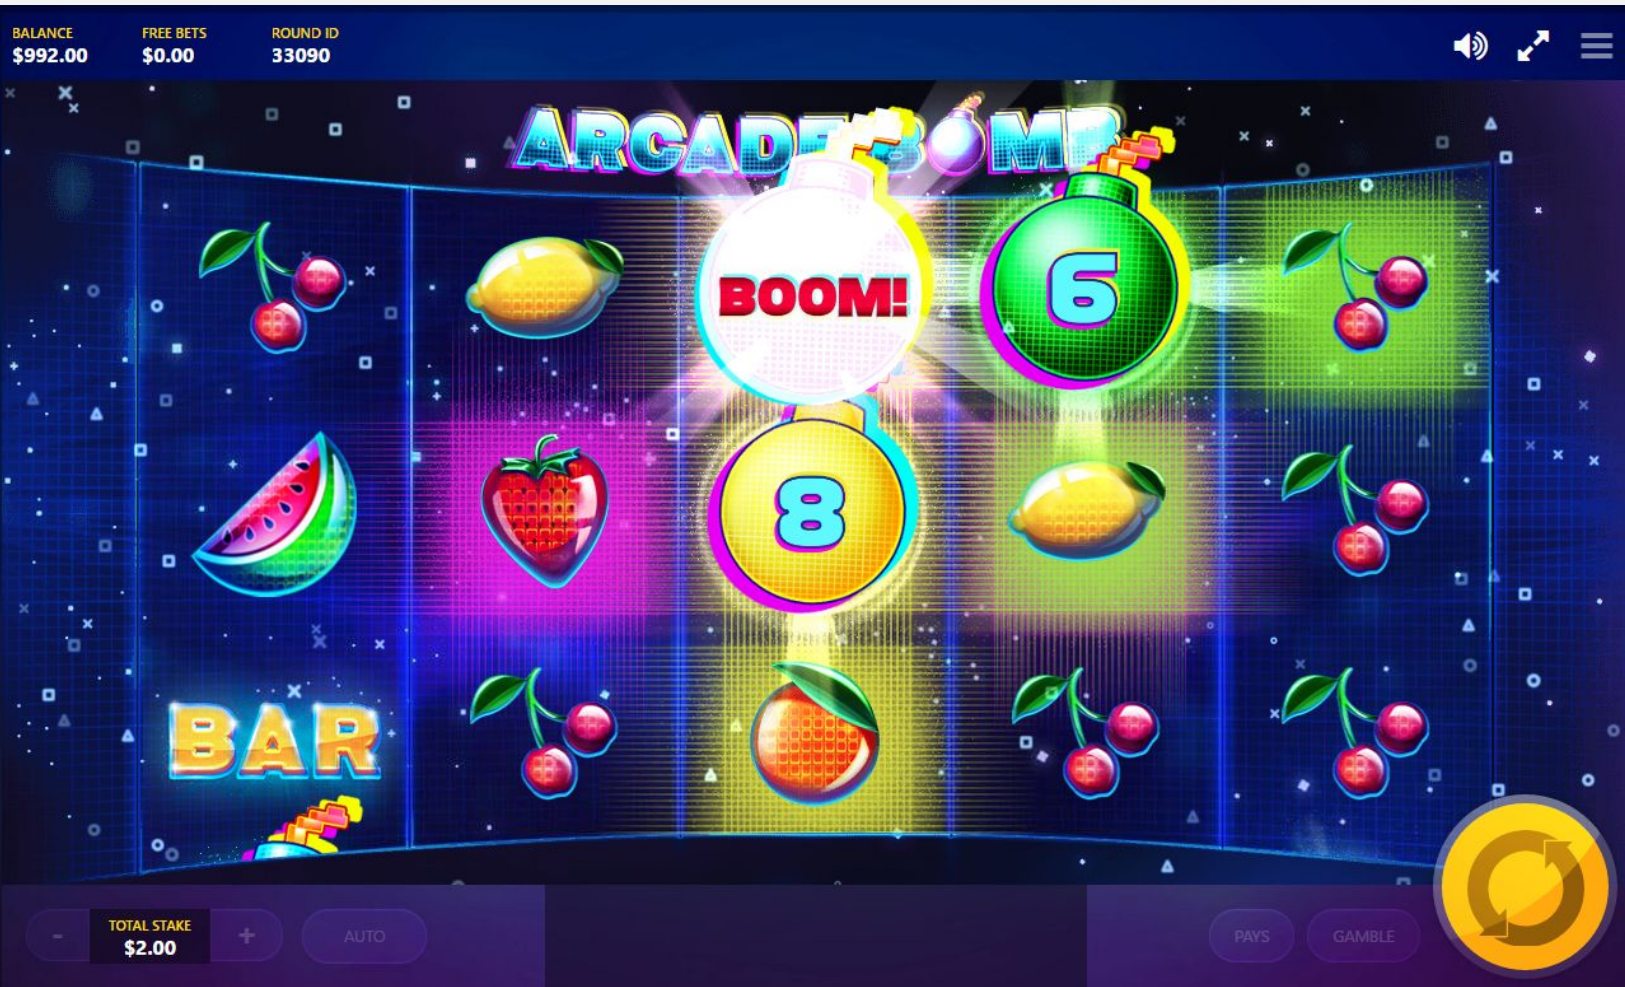

All wins pay when symbols match a payline pattern from either sides of the reels or in the middle. The prize value is the sum staked per line, multiplied by the applicable prize multiplier as advertised on the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.
