GAME FEATURES

Clue Symbols

Clue special symbols may land on Reels 2, 3, and 4. They are recorded under the Suspects on the left-hand side of the gaming grid. When you collect 7 Clues, you trigger the Interrogation feature.

Suspects

Three silhouettes of Suspects on Polaroid photographs wait for your enquiries by the reels. Each has instant cash rewards, changing on every spin, determined by the following random Multipliers of the original wager.

- Suspect 1: 5x, 10x or 15x.
- Suspect 2: 25x, 30x, 40x, 50x or 75x.
- Suspect 3: 100x, 150x, 250x, 350x or 500x

Interrogation Feature

When you collect 7 Clue symbols, the Interrogation feature starts with Suspect 1 at the bottom. An Interrogation may be Successful or Unsuccessful, which result is chosen at random. On a Successful Interrogation, the given Suspect's instant cash reward is saved, and you move on to the next Suspect. The Interrogation feature ends when the Interrogation is Unsuccessful, or all Suspect Interrogations are Successful. The sum gathered through the Interrogation pays out at the end of the feature.

Evidence Symbols

Only 1 Evidence symbol may land on the Middle reel at any given spin. Evidence symbols contribute towards solving the Cases on the right-hand side of the reels.

Cases

A total of 3 Cases wait for your brilliant solutions by the gaming grid. Every Case needs the collection of 10 Evidence symbols to be solved. Solving the Cases boosts your Interrogation progress when the feature triggers next.

- Solving Case 1 guarantees your 1st Interrogation is Successful and grants a reward when the Interrogation feature is triggered.
- Solving Case 2 reduces the required number of Clues from 7 to 5 to trigger the Interrogation feature.
- Solving Case 3 unlocks Suspect 4 atop the 3 Case files. When all the 3 Suspect Interrogations are Successful, you can interrogate Suspect 4 for a stunning 2,000x Multiplier to the original wager.

About Red Tiger Jackpots

Like all Red Tiger slots, Case Closed™ may be taken with or without Red Tiger jackpots. If a jackpot version of the base game is taken, it must be paired with a jackpot contribution to get the final overall RTP of the game. For example pairing the with-jackpot base game certified at 95.19% RTP and adding a 1% jackpot contribution gives an overall RTP of 96.19%. The RTP of the jackpot contribution itself is 100%.
